Compliance Inquiry Letter

Dear Ms. Tin:

In reply to the subject compliance inquiry letter dated November 6, 1987 the following actions will be taken to resolve the apparent violations.

35 Illinois Adm. Code 722.123 (a) no manifest on site. Manifests will be relocated from current files to the South Chicago Plant. This action will be complete by November 30, 1987.

35 Illinois Adm. Code 725.115 (b) no inspection schedule for the E.A.F. dust waste pile. This facility is no longer in use. Sampling by LTV and IEPA indicated that the area is no longer contaminated. Therefore, LTV Steel respectfully requests to inspect the area at a frequency consistent with the approved closure plan until certification of closure is accepted by IEPA.

In addition, the drum storage area addressed in the closure plan will be recertified after resample wipe tests for lead are completed.

Please refer any questions to the writer.

Very truly yours,

LTV STEEL COMPANY
